

Dear Sir Or Madam:

I respectfully urge you to strongly and completely reject the NAB's petition 04-160, which would stop XM satellite radio from providing instant traffic & weather.

As an owner of an XM radio, the service provides me with the variety and quality of programming that are not available elsewhere. It comes down to choices, and thankfully I have them with satellite radio. I'm proud to live in a land where I can choose and pay for these services and programming choices; I would find it to be extremely disconcerting if a group such as the National Association of Broadcasters were to dictate what I am permitted to hear.

Once again, please reject the NAB's petition 04-160. You will be helping all consumers choose the kind of programming that we demand and deserve.

Respectfully Yours,
Tim DeBacco
